PROFILE

Starting-level Data Analyst skilled in SQL, Python, Excel, Power BI, and Tableau with a background in data cleaning, exploratory data analysis (EDA), and visualization. Interested in uncovering actionable insights from data and enabling data-driven decision-making.

EXPERIENCE

GeeksForGeeks

Data Analyst

Pune

Mar 2025 – Jun 2025

- Contributed to data analysis projects using tools such as **MySQL**, Excel, **Python**, and **Power BI**.
- Performed exploratory data analysis (EDA) using Python libraries including **NumPy**, **Pandas**, **Matplotlib**, and **Seaborn**.

PROJECTS

• Exploratory Data Analysis of Salary Variation Based on Demographics

Conducted in-depth EDA on a salary dataset to understand salary patterns across demographics such as age, gender, education, and job title.

- Cleaned and preprocessed the dataset using **Pandas**, handling null values and consolidating job/education titles.
- Visualized data distribution and relationships using **Seaborn** and **Matplotlib** (boxplots, violin plots, scatter plots, heatmaps).
- Grouped and analyzed categorical variables like gender, race, education level, and job title to examine their effect on salary.
- Built insights on how demographics influence salary trends using statistical plots and correlation analysis.
- Skills:** Python, Pandas, Matplotlib, Seaborn, Data Cleaning, EDA, Data Visualization

• SQL-Based Financial Data Analysis Project

Performed advanced SQL queries on the **FinancialData** table to extract meaningful insights on company performance over time.

- Calculated total revenue per year, average profits per company, and year-wise expense maximums.
- Identified top-performing companies by revenue and profit in specific years (e.g., 2010, 2012).
- Analyzed earnings per share and total profits, including company-wise trends from 2010–2012.
- Computed percentage profit change per company and detected companies with consistent profit growth.
- Used aggregation, filtering, ordering, subqueries, and windowing logic in SQL.
- Skills:** SQL, MySQL, Data Aggregation, Time Series Analysis, Query Optimization

SKILLS

Technical Skills

SQL, Python, Power BI, Excel, Data Analytics, Research, Tableau

Soft Skills

Communication, Critical Thinking, Ethical Considerations, Patience, Presentation Skills

Functional Tools

VS Code, Jupyter Notebook, Google Colab, MySQL, NoSQL

EDUCATION

- Bachelor of Artificial Intelligence and Data Science

2024 – 2028
